RE: I/M/O the Petition of New Jersey-American Water Company, Inc. for

an Increase in Rates for Water and Sewer Service and Other Tariff

Modifications

BPU Docket No. WR03070511

OAL Docket No. PUCRL 07279-2003N

TO SERVICE LIST MEMBERS:

Enclosed please find the electronic copies of the direct testimonies of the Division of the Ratepayer Advocate's witnesses, Robert J. Henkes, James A. Rothschild, Barbara R. Alexander, Howard J. Woods, and Brian Kalcic, in connection with the above referenced matter.

Should you require anything further, please do not hesitate to contact our office.

Very truly yours, SEEMA M. SINGH, ESQ. RATEPAYER ADVOCATE

By:	
Robert J. Brabston, Esq.	
Deputy Ratepayer Advocate	

RJB/slc

BEFORE THE STATE OF NEW JERSEY BOARD OF PUBLIC UTILITIES OFFICE OF ADMINISTRATIVE LAW

IN THE MATTER OF THE PETITION

DIRECT TESTIMONY AND EXHIBITS OF BRIAN KALCIC ON BEHALF OF THE NEW JERSEY DIVISION OF THE RATEPAYER ADVOCATE

SEEMA M. SINGH, ESQ. RATEPAYER ADVOCATE

Division of the Ratepayer Advocate 31 Clinton Street, 11th Floor P.O. Box 46005 Newark, New Jersey 07101 (973) 648-2690 – Phone (973) 624-1047 – Fax www.rpa.state.nj.us njratepayer@rpa.state.nj.us

Filed: December 1, 2003

1	Q.	PLEASE STATE YOUR NAME AND BUSINESS ADDRESS.
2	A.	Brian Kalcic, 225 S. Meramec Avenue, Suite 720, St. Louis, Missouri 63105.
3		
4	Q.	WHAT IS YOUR OCCUPATION?
5	A.	I am an economist and consultant in the field of public utility regulation, and principal of
6		Excel Consulting. My qualifications are described in the Appendix to this testimony.
7		
8	Q.	ON WHOSE BEHALF ARE YOU TESTIFYING IN THIS CASE?
9	A.	I am testifying on behalf of the New Jersey Division of the Ratepayer Advocate
10		("Ratepayer Advocate").
11		
12	Q.	WHAT IS THE SUBJECT OF YOUR TESTIMONY?
13	A.	The Ratepayer Advocate requested that I review the cost-of-service and rate design
14		analysis submitted by New Jersey-American Water Company ("NJAWC" or
15		"Company"), and present my findings and conclusions with respect to the Company's
16		proposed rate structure. In addition, I am sponsoring an appropriate rate design that
17		would recover the Ratepayer Advocate's recommended revenue requirement in this
18		
10		proceeding.
19		proceeding.

Q. PLEASE SUMMARIZE YOUR RECOMMENDATIONS.

- 2 A. Based upon my review of the Company's filing and existing rate structure, I recommend
- that Your Honor and the New Jersey Board of Public Utilities ("Board" or "BPU") order
- 4 the Company:

5

1

to adopt the Ratepayer Advocate's revisions to NJAWC's class cost-of-service
 analysis;

8

• to adopt the Ratepayer Advocate's recommended revenue distribution which

reflects an appropriate balance between traditional cost of service and gradualism

considerations; and

12

13

14

15

 to implement the Ratepayer Advocate's recommended rate design which, like the Company's proposal, reflects a further consolidation of NJAWC's General Metered Service ("GMS") and Fire Protection Service rate schedules.

16

17

Q. HOW IS THE REMAINDER OF YOUR TESTIMONY ORGANIZED?

A. Section I of my testimony discusses the Company's cost-of-service methodology and
presents the Ratepayer Advocate's revised cost analysis. In Section II, I utilize the results
of the Ratepayer Advocate's cost-of-service analysis to develop my recommended class
revenue distribution and rate design.

Cost-of-Service Study

3 Q. MR. KALCIC, WHAT TYPE OF COST-OF-SERVICE STUDY DID NJAWC

4 PERFORM FOR THIS PROCEEDING?

A. Company witness Paul R. Herbert sponsored a class cost-of-service analysis (included in Exhibit PT-8A) for water service customers at the Company's requested revenue

requirement level utilizing the Base Extra-Capacity ("BEC") cost methodology.

Q. PLEASE SUMMARIZE THE MAJOR COMPONENTS OF THE BEC COST

METHODOLOGY.

A. In general, the BEC methodology consists of two major steps. First, the utility's system-wide revenue requirement is *classified* into functional cost categories (e.g., base and extra capacity). Second, each functional cost category is *allocated* to rate classes in accordance with a factor that reflects relative cost responsibility.

The BEC functionalization and allocation steps combine to produce a measure of total cost of service, by rate class. By comparing allocated cost responsibility to actual revenue levels, one can determine whether a given rate class is contributing above or below its cost-of-service indications.

1	Q.	IS THE COMPANY'S COST-OF-SERVICE METHODOLOGY CONSISTENT
2		WITH THAT EMPLOYED IN ITS MOST RECENT BASE RATE
3		PROCEEDING (I.E., BPU DOCKET NO. WR98010015)?
4	A.	Yes, it is.
5		
6	Q.	MR. KALCIC, BASED UPON YOUR REVIEW OF NJAWC'S COST-OF-
7		SERVICE STUDY, DO YOU RECOMMEND THAT ANY CHANGES BE
8		INCORPORATED IN THE COMPANY'S BEC COST METHODOLOGY AT
9		THIS TIME?
10	A.	Yes. While I have generally adopted Mr. Herbert's methodology, I do recommend an
11		adjustment to certain allocation factors used to assign a portion of Taxes Other Than
12		Income in the Company's study.
13		
14	Q.	PLEASE DISCUSS YOUR RECOMMENDED CHANGE.
15	A.	On Schedule B, page 10 of 10 of Exhibit PT-8A, the Company proposes to allocate
16		Utility Regulatory Assessment Fees and Property Taxes on Factor 16. However, Factor
17		16 is derived (internally) from the allocation of NJAWC's total operation and
18		maintenance expenses ("O&M") excluding purchased water, power, fuel, chemicals and
19		waste disposal. In my opinion, a more accurate allocation factor than O&M exists for
20		both of these expense categories.

1 Since the Company's Utility Regulatory Assessment Fees are a function of its 2 total rate revenues, I recommend allocating this expense on Factor 20 which is derived 3 from total class cost of service (excluding GRAFT). In the case of Property Taxes, I recommend allocating such taxes on the basis of Factor 18 which is equivalent to original 4 cost plant in service less depreciation. 5 6 7 Q. HAVE YOU CONDUCTED A REVISED COST-OF-SERVICE ANALYSIS FOR 8 NJAWC EMPLOYING THE ABOVE ADJUSTMENTS, AT THE RATEPAYER 9 ADVOCATE'S OVERALL RECOMMENDED REVENUE REQUIREMENT LEVEL? 10 11 A. Yes, I have. Schedule BK-1 summarizes the results of my recommended cost study using the individual revenue requirement adjustments sponsored by Mr. Henkes. For ease of 12 13 identification, all of the Ratepayer Advocate's recommended revenue adjustments are 14 shown in *shaded* format. 15 WHAT IS SHOWN IN SCHEDULE BK-2? 16 O. A. Schedule BK-2 provides an update to the Company's present value analysis contained in 17 Exhibit No. PT-8C, using the Ratepayer Advocate's overall recommended rate of return. 18 This analysis is utilized in the design of NJAWC's Off-Peak Resale Service rate, and will 19 be discussed later in my testimony. 20

21

1	Q.	DID YOU PERFORM A SEPARATE COST-OF-SERVICE ANALYSIS OF
2		MONMOUTH-ONLY COSTS, SUCH AS CONTAINED IN EXHIBIT NO. PT-
3		8D, AT THE RATEPAYER ADVOCATE'S RECOMMENDED REVENUE
4		REQUIREMENT LEVEL?
5	A.	No, I did not. The Ratepayer Advocate's recommended revenue requirement was not
6		developed on a separate Monmouth-only basis. Consequently, such an analysis could not
7		be conducted. As the Company uses Exhibit No. PT-8D as a guide to develop its
8		proposed Manasquan Uninterruptible service rate, my recommended rate design for such
9		customers will, of necessity, differ somewhat from the Company's approach.
10		
11	Q.	MR. KALCIC, HAVE YOU UTILIZED THE COST-BASED CLASS REVENUE
12		REQUIREMENTS PRESENTED IN SCHEDULE BK-1 AS A GUIDE IN
13		PREPARING YOUR RECOMMENDED RATE STRUCTURE?
14	A.	Yes, I have.
15		
16		Revenue Distribution / Rate Design
17		
18	Q.	MR. KALCIC, HOW DOES THE COMPANY PROPOSE TO RECOVER ITS
19		REQUESTED REVENUE INCREASE IN THIS PROCEEDING?
20	A.	Schedule BK-3 summarizes the Company's proposed class revenue distribution. The
21		class increases shown on Schedule BK-3 range from 7.8% (Public Fire) to 22.6%

1		(GMS) for water service, and from 0.2% (Lakewood) to 17.4% (Adelphia) for sewer
2		service.
3		
4	Q.	HOW DID MR. HERBERT ARRIVE AT THE PROPOSED REVENUE
5		DISTRIBUTION SHOWN IN SCHEDULE BK-3?
6	A.	On page 8 of his direct testimony, Mr. Herbert indicates that the Company's proposed
7		revenue distribution and rate design reflect the following considerations: 1) class cost of
8		service indications; 2) the present status of certain rate schedules; 3) the goal of rate
9		consolidation; 4) the nature of existing contracts; and 5) the relative level of the
10		Company's fixed charge revenue.
11		
12	Q.	MR. KALCIC, HAVE YOU DEVELOPED A RECOMMENDED CLASS
13		REVENUE DISTRIBUTION FOR THIS PROCEEDING?
14	A.	Yes, I have. My recommended class revenue distribution is shown in Schedule BK-4.
15		
16	Q.	HOW DID YOU DERIVE THE REVENUE DISTRIBUTION SHOWN IN
17		SCHEDULE BK-4?
18	A.	I utilized most if not all of the same considerations identified by Mr. Herbert to guide the
19		development of the Ratepayer Advocate's recommended revenue distribution, although
20		the underlying weight given to the various considerations undoubtedly differs.

As a first step, I assigned a recommended revenue adjustment to each of the Company's sewer districts. Specifically, I chose to move each rate district one-half the distance to full cost of service at the Ratepayer Advocate's recommended revenue requirement. This resulted in an overall sewer revenue decrease of 0.6% as shown on line 13 of Schedule BK-4. Next, I determined the level of the revenue adjustments that should be assigned to the Company's fire service classes. Since both the Private and Public Fire protection classes are over-contributing, I chose to assign no overall increase to either rate class. Instead, I recommend continuing the process of consolidating the Company's various fire service rate schedules, as discussed in detail below. However, as a result of my rate consolidation recommendations, the *overall* fire protection classes receive slight decreases ranging from 0.1% and 0.3% in Schedule BK-4.

My recommended increase to NJAWC's Commodity-Demand resale service class is 0.1%, as shown on line 2 of Schedule BK-4. This increase would move the Commodity-Demand class to full cost of service. The Ratepayer Advocate's recommended Off-Peak Resale service increase is 0.6%, as shown on line 7 of Schedule BK-4. This increase follows directly from my recommended Commodity-Demand Resale service rate design, as discussed below.

Finally, as both the GMS and Manasquan Uninterruptible service classes are under-contributing in my recommended cost study, I chose to assign each of these classes the residual increase (1.3%) necessary in order to arrive at Mr. Henkes' overall recommended increase of \$2.672 million.

1		
2	Q.	MR. KALCIC, HAVE YOU SUMMARIZED YOUR RECOMMENDED
3		CLASS COST OF SERVICE AND CLASS REVENUE LEVELS ON A SINGLE
4		SCHEDULE, SIMILAR TO THE COMPANY'S SCHEDULE A IN EXHIBIT
5		PT-8A?
6	A.	Yes. Schedule BK-5 contrasts class cost of service with present and recommended class
7		revenue levels, in the same format as Schedule A in Exhibit PT-8A.
8		
9	Q.	WHAT INFORMATION IS PRESENTED IN SCHEDULE BK-6?
10	A.	Schedule BK-6 presents the Ratepayer Advocate's recommended rate design and proof
11		of revenue. Present class rate revenue is derived in column 3 from the class billing
12		determinants and present rates shown in columns 1 and 2, respectively. The Ratepayer
13		Advocate's class billing determinants reflect the pro forma revenue adjustments shown in
14		Schedules RJH-10 and RJH-11, and produce total pro forma operating revenues at
15		present rates of \$252.5 million. I note that all of the Ratepayer Advocate's billing
16		determinant adjustments associated with Mr. Henkes' sales normalization
17		recommendations (i.e., Schedule RJH-10) are reflected in the Off-Peak Sales for Resale
18		and Sales for Resale classes shown on Schedule BK-6, page 2 of 7.1

5 shows the annual class revenue produced by the recommended rates in column 4.

The Ratepayer Advocate's recommended rates are shown in column 4. Column

19

20

¹ Mr. Henkes' adjustment for Antenna Lease revenues is included in total Other Revenue shown on Schedule BK-6, page 6 of 7.

1		Finally, column 6 shows the recommended percentage increases to individual tariff
2		components and class revenue levels.
3		
4	Q.	PLEASE DISCUSS YOUR SPECIFIC RATE DESIGN
5		RECOMMENDATIONS, BEGINNING WITH THE COMPANY'S SEWER
6		SERVICE CUSTOMERS.
7	A.	My recommended rates for sewer service are shown on Schedule BK-6, page 7 of 7.
8		All individual charges were adjusted in an across-the-board fashion, by sewer district, to
9		arrive at the total revenue adjustments shown in Schedule BK-4, lines 10-13.
10		
11	Q.	CONTINUING IN THE SAME ORDER OF PRESENTATION AS YOUR
11 12	Q.	CONTINUING IN THE SAME ORDER OF PRESENTATION AS YOUR PREVIOUS REVENUE DISTRIBUTION DISCUSSION, PLEASE DISCUSS
	Q.	
12	Q.	PREVIOUS REVENUE DISTRIBUTION DISCUSSION, PLEASE DISCUSS
12 13	Q.	PREVIOUS REVENUE DISTRIBUTION DISCUSSION, PLEASE DISCUSS HOW YOU DEVELOPED YOUR RECOMMENDED PUBLIC FIRE
12 13 14		PREVIOUS REVENUE DISTRIBUTION DISCUSSION, PLEASE DISCUSS HOW YOU DEVELOPED YOUR RECOMMENDED PUBLIC FIRE PROTECTION RATES.
12 13 14 15		PREVIOUS REVENUE DISTRIBUTION DISCUSSION, PLEASE DISCUSS HOW YOU DEVELOPED YOUR RECOMMENDED PUBLIC FIRE PROTECTION RATES. As shown on Schedule BK-6, page 3 of 7, NJAWC presently maintains five (5) separate
12 13 14 15 16		PREVIOUS REVENUE DISTRIBUTION DISCUSSION, PLEASE DISCUSS HOW YOU DEVELOPED YOUR RECOMMENDED PUBLIC FIRE PROTECTION RATES. As shown on Schedule BK-6, page 3 of 7, NJAWC presently maintains five (5) separate public fire rate schedules. Under my recommended rate design, the number of rate
12 13 14 15 16		PREVIOUS REVENUE DISTRIBUTION DISCUSSION, PLEASE DISCUSS HOW YOU DEVELOPED YOUR RECOMMENDED PUBLIC FIRE PROTECTION RATES. As shown on Schedule BK-6, page 3 of 7, NJAWC presently maintains five (5) separate public fire rate schedules. Under my recommended rate design, the number of rate schedules would be reduced to four (4), with Howell's public hydrant charges reduced to

1 way toward the underlying statewide hydrant cost of \$29.45 per month, which results in 2 an increase of 3.5%. Adelphia customers would remain on a separate rate schedule. 3 4 Q. HOW DID YOU DEVELOP YOUR RECOMMENDED PRIVATE FIRE **PROTECTION RATES?** 5 My recommended rates for Private Fire Protection service are also shown on Schedule 7 BK-6, page 3 of 7. Under my recommended rate design, I have moved half way toward equalizing rates under the statewide rate schedule (Rate L) and Rate J by implementing 8 equal (but opposite) rate adjustments of approximately 6.8%. As in the Company's 9 proposal: a) Rate J-1 would be merged with Rate J; b) Rate K-2 charges would be 10 11 moved half way toward the (new) level of Rate L rates; and c) stand-by and sprinkler charges under Rates K-1 and L-1 were left unchanged. Finally, I assigned the average 12 Rate J increase of 6.8% to the hydrant charges in Rates K-1 and L-1. 13 14 Q. PLEASE DISCUSS YOUR RECOMMENDED RATES FOR COMMODITY-15 DEMAND RESALE AND OFF-PEAK SALES FOR RESALE SERVICE.

16

17

18

19

20

My recommended rates for these two classes are shown on Schedule BK-6, page 2 of 7. A. In general, my recommended rate design follows the same methodology as the Company, but utilizes the Ratepayer Advocate's cost of service results as inputs. As previously mentioned, I have targeted the Commodity-Demand Resale class with a cost-based

² In other words, the existing rate differentials between Rate L and Rate J are reduced by one-half in Schedule BK-6.

increase of 0.1%. The class's usage charge (non-exempt) was set at the underlying variable cost level of \$0.3106 per thousand gallons, and the balance of class revenue requirement target was recovered via a demand rate of \$62.86.

To develop my recommended Off-Peak Sales for Resale service rates, I first updated the Company's analysis of the present value of the savings associated with delaying the construction of 1 MGD in treatment capacity for eight years. My updated analysis, shown in Schedule BK-2, modifies the Company's study for the following: 1) a revenue requirement factor that reflects the Ratepayer Advocate's recommended cost of capital; and 2) a two-year adjustment for inflation in the initial (i.e., Year 1) cost of the treatment facilities.³ As in the Company's proposed rate design, I have applied the resulting savings to the Off-Peak demand rate, which amounts to 92.57% of the corresponding Commodity-Demand Resale charge.

Q. HOW DID YOU DETERMINE YOUR RECOMMENDED CUSTOMER CHARGES WHICH ARE SHOWN ON PAGES 4 AND 5 OF SCHEDULE BK-

6?

A. First, all current statewide customer charges were increased 2 times the Ratepayer

Advocate's overall recommended increase, or approximately 2.3%. The customer

charges for former Chester customers were then set equal to the statewide average.

³ The two-year inflation adjustment is based on the assumption that the Company's original 2001 construction cost estimates have not been updated in Exhibit No. PT-8C.

1		Finally, I moved the customer charges in Logan half way towards the corresponding
2		statewide charges.
3	Q.	MR. KALCIC, PLEASE EXPLAIN HOW YOU DEVELOPED YOUR
4		RECOMMENDED CONSUMPTION CHARGE FOR THE COMPANY'S
5		GMS AND REGULAR SALES FOR RESALE CUSTOMERS.
6	A.	As previously mentioned, I assigned a residual increase of 1.3% to the GMS class.
7		Accordingly, after allowing for the revenue increase generated by my recommended
8		customer charges, I set the consumption charge at the residual level necessary to attain the
9		targeted class increase of 1.3%. The resulting level is \$4.0488 per thousand gallons for
10		non-exempt customers.
11		
12	Q.	WOULD ALL GMS CUSTOMERS PAY THE SAME CONSUMPTION
13		CHARGE UNDER YOUR RECOMMENDED RATE DESIGN?
14	A.	Yes. As a result, with the exception of Logan, all of the Company's GMS customers
15		would now be consolidated on a single rate schedule. ⁴
16		
17	Q.	HOW DID YOU DEVELOP YOUR RECOMMENDED MANASQUAN
18		UNINTERRUPTIBLE SERVICE USAGE CHARGE?
19	A.	As in the case of my recommended GMS rate design, I increased the usage charge by the
20		residual amount necessary to achieve a targeted increase of 1.3% for the class. The

⁴ Logan customers would continue on a separate rate schedule due to the level of their customer charges.

1		resulting exempt and non-exempt consumption rates are shown on Schedule BK-6, page
2		2 of 7.
3		
4	Q.	HAVE YOU PROVIDED A SUMMARY OF YOUR RECOMMENDED
5		GENERAL METERED SERVICE RATES?
6	A.	Yes. Schedule BK-7 provides a comparison of present and recommended GMS
7		charges, by current rate area.
8		
9	Q.	MR. KALCIC, DO YOU RECOMMEND ANY CHANGES TO THE
10		COMPANY'S CURRENT CHARGES FOR RECONNECTION OF SERVICE?
11	A.	No. Given the modest size of the Ratepayer Advocate's overall recommended increase,
12		combined with the fact that NJAWC's present charges for such service already exceed
13		those in Elizabethtown and Mount Holly, I recommend that reconnection charges remain
14		unchanged.
15		
16	Q.	DOES THIS CONCLUDE YOUR DIRECT TESTIMONY?
17	A.	Yes.

APPENDIX

Qualifications of Brian Kalcic

Mr. Kalcic graduated from Illinois Benedictine College with a Bachelor of Arts degree in Economics in December, 1974. In May, 1977 he received a Master of Arts degree in Economics from Washington University, St. Louis. In addition, he has completed all course requirements at Washington University for a Ph.D. in Economics.

From 1977 to 1982, Mr. Kalcic taught courses in economics at both Washington University and Webster University. The courses that he taught included Microeconomic and Macroeconomic Theory, Labor Economics and Public Finance.

During 1980 and 1981, Mr. Kalcic was a consultant to the Equal Employment

Opportunity Commission, St. Louis District Office. His responsibilities included data collection
and organization, statistical analysis and trial testimony.

From 1982 to 1996, Mr. Kalcic was employed by the firm of Cook, Eisdorfer & Associates, Inc. During that time, he participated in the analysis of electric, gas and water utility rate case filings. His primary responsibilities included cost-of-service and economic analysis, model building, and statistical analysis.

In March 1996, Mr. Kalcic founded Excel Consulting, a consulting practice which provides business and regulatory analysis.

Mr. Kalcic has previously testified before the state regulatory commissions of Delaware, Kentucky, Maine, Massachusetts, Minnesota, Missouri, New Jersey, New York, Ohio, Oregon, Pennsylvania, Texas, and the Bonneville Power Administration.
